"X": Compatible (**MB-***MB/ *GB) indicates the capacity from **MB up to ***MB/ *GB.)

"XX": Compatible with reservation

"-": Not compatible

*1 When the sticker which says "Compatible to 32MB" is put on the outer package of the camera, SmartMedia with the capacity of 32MB, 64MB or 128MB can be used. (If there is no sticker on the package, it is NOT compatible to Exif, DCF or DPOF format.)

*2 Please do NOT connect SmartMedia with the capacity of 32MB and over to the MacOS under 7.6. The image data might be damaged once the card was connected with those MacOS.

*3 Please visit [FlashPath driver](#) for downloading the latest issue of drivers.

*4 VS100 can display the maximum 2000 image. Please note that image over 2000 stored in SmartMedia cannot be displayed on TV.

*5 You can purchase only as the package deal combining with xD-Picture Card, can not purchase MAUSB-200 as single item.

*6 By updating the driver, xD-Picture Card Type M+/M/H can be used.
Please visit [MAUSB-10 driver](#) for downloading the latest issue of drivers.

*7 Please contact [Olympus authorized distributor or service center](#) in your region for the purchase information about xD-Picture Card Type M+/M/H.
